The private owner offers to sell the manufacturing company focused on the production of plastic closures for the food, cosmetic, chemical and pharmaceutical industries. The production portfolio of the company includes:- production of closures for PET bottles and glass bottles- production of closures and necks for tubes- production of cups for medical needs- small technical products from plastic. The annual production capacity of plastic closures for pharmaceutical, food, cosmetic and chemical industries is 60 million units. The company is well established in the European market for over 18 years and its products meet the requirements for food contact as well as the health mark in accordance with the standards of the European Union. More information about the selling price, financial indicators, machinery and properties will be provided according to letter of interest (LOI). In case of further information, you can contact us via email: saei@saei.sk
