ENVIRONMENTAL MISSION of

ROKOSAN Ltd.

disposing of poultry feathers into eco-product
liquid organic fertilizer

We are looking for a joint-venture partner for AgroBioFert Plant project worldwide. We offer a streamlined and cost-saving system for disposal of feathers into an ecological product - liquid fertilizer rich on organic nitrogen. Investment is between 1 - 3 mil. EUR. Return on investment between is 12 - 36 months. Model of Joint-Venture cooperation: Our company will provide existing know-how and new technological knowledge from the practice, results of science and research, achieved agricultural experiment from different countries, documents for the certification and authorization processes, marketing documents, project documentation for building and technological process. We will provide all necessary documents and supervision of the start-up production and logistics for inputs and warehousing of finished product. Joint-Venture partner will secure the sales of all production capacity of the plant. Partner will provide the location for production, all permissions for building and technological process of the plant, certification of required products for production and permissions for sale. Partner will do marketing and sale of whole production based on the future contracts with guaranteed sale. Partner will provide various forms of investment state aid for us as a strategic investor, financial and tax relief and state subventions for farmers. Partner will provide financial instruments for plant construction from own sources or investor's sources or loans for joint-venture. In the joint-venture partnership we can accept also state or local province or municipality's percentual
