We are offering the production facility based on the expertise of craftsmen and hand lay-up laminating techniques.

The company is capable of handling small, medium and large production volumes.

The company can act as a platform for market entry and growth and provide opportunities for further expansion of its partnerships with key organisations.

Opportunities exist for process optimization, cross-selling, cost optimization and other high-potential synergies.

The company is a manufacturer of composite body parts for automotive, railway, construction and agriculture vehicles.

Manufacturer makes its own molds in a laminate thickness that results in durable molds known for exceptional high quality and a long-life.

Please, contact us for more information at: saei@saei.sk
